

## Highlights from the third TPM in Piraeus

The OPTIMA consortium gathered in Piraeus, Greece, for the third Transnational Project Meeting, hosted by IDEC from June 25th to 27th, 2025. Partners from across Europe met to discuss the project's progress and align efforts for the upcoming implementation phase.

The central focus of the meeting was the finalization of the Training Programme for Mentors, a key output designed to support sustainable farming through intergenerational knowledge transfer.

The meeting also provided an opportunity to plan the development of the Training Programme for Farmers, as well as a series of national info days aimed at engaging farmers and local stakeholders. Additionally, the consortium will produce a set of informative videos and good practice materials to support the project's outreach and learning objectives.

Dissemination activities continue to grow, with regular updates shared through the project website and social media. Partners are also preparing printed materials and digital content to support national and European-level engagement, including brochures and posters in multiple languages.

We thank IDEC for hosting the meeting and all partners for their contributions. OPTIMA is now entering a crucial phase of fieldwork and testing, and we look forward to sharing more results with you in the coming months.

Wishing you a wonderful and restful summer from the entire OPTIMA team!
